## Deserred Record of Brilliant Exploits.

Six other south of Contern. June 21, 1982.

From Our Special Correspondent.

In a former letter I have already given an account of the brilliant dash of the cavalry brigade under Col. Ellion on the day of the evacuation of Colinth, right between the retrecting columns of the etemy, reaching in the destruction of the Mobile and Ohio Ealroad at Boonsyille and the capture of thousands of priseners, and an immerse train loaded with hundreds of thousands of olders worth of Rebel property. The version of the exploit then given was obtained from indirect countries for the exploit then given was obtained from indirect countries. From the very day they landed at Hamburg, portions of it engaged almost daily in venture some, successful, outpout enterprises. The gallant charge of the brigade upon a Rebel buttery near Paramington, on the 9th ult., alone won for it the confidence and admiration of the whole army. Its efficiency is principally due to the efforts of Col. Einott, then whom a better cavalry officer can build be found in the service. It is but gratifying that he has already obtained his well-deserved reward by his promotion to a Brigader Generalship.

MORE COTTON BURNING NEAR MEMPHIS.

From The Memphis Asolanche, June 27.

The people living on the line of the Charleston Road are kept in terror by recent raids in that vicinity. A highly respectable citizen, who lives about 15 miles from town, and formerly one of our leading merchants, informs us that on Wednesday Jackson's cavalry made its appearance in force along the Memphis and Charleston Railroad, and for the avowed object of burning cotton and punishing all who had thatled to conduct themselves to their liking. The cavalry force under Jackson was large, and section to bound for District No. 9, a discrict in which there was considerable cotton, none of which the Confederate had had time to burn before the occupation of Memphis. This district is reached by the Macon Road, and is said to contain about 1,500 bales of cotton. This, or at least the larger person of it, was destroyed by the Confederates on Wednesday. Two persons who were up there buying cotton were arrested and taken South. And our informant states that the Confederate cavalry threatened to take as prisoners and to desirey all the property of all persons who, ch any pretext, should come to the City of Memphis. They also stated that their intention is and will be to destroy the railroad and felegraph. becoming of corollers, that, during the pursuit occurs which is surprised that there is a contract of the probability of the contract of the probability of the propose of the probability of the probability of the propose of the probability of the probability of the probability of the propose of the probability of the probability of the propose of the propose of the probability of the probability of the propose of the probability of the propose of the propose of the propose of the probability of the propose of the propose of the probability of the probability
